EDUCATION

North Carolina Agricultural and Technical State University - Greensboro, NC

May '27

Earning a Bachelor of Science in Computer Science | GPA: 3.54/4.0

TECHNICAL SKILLS

Language: Java, Python, HTML/CSS, JavaScript, C++, ReactJS

Tools: Visual Studio Code, IntelliJ IDEA, 3D Max, Game Maker, QuickBooks, Excel (including VLOOKUPS and macros), Adobe After Effects, Adobe Photoshop, Microsoft Word

WORK EXPERIENCE

Lowe's Software Engineer

May '25 - Aug '25

Intern | Charlotte, North Carolina

- Collaborated on an Agile Scrum team to build and improve features for the Lowe's internal **TechHub platform**, helping thousands of employees navigate technical tools by developing **React interfaces**, integrating with backend **APIs**, and managing **PostgreSQL datasets**.
- Gained hands-on experience with **Spring Boot**, **Cypress testing**, **Jira**, and **GitHub**, applying these tools across multiple sprints to ensure quality and consistent delivery of new features.
- Led a final team presentation to over **30+ engineers and stakeholders**, clearly communicating our technical solutions and the impact of our sprint work on platform usability.

Capital One Launchpad Program - 3rd Place Case Study Winner

July '25

Fellow | McLean, Virginia

- Selected to attend the **25th Annual Capital One Immersion Program** in partnership with **Thurgood Marshall College Fund (TMCf)**, designed to prepare high-achieving students from HBCUs for careers in tech, finance, and leadership.
- Participated in interactive workshops, a **real-world case study challenge**, and collaborative team activities, earning **3rd place out of 16** teams for a solution focused on innovation and impact.
- Gained insight into Capital One's innovation culture while strengthening analytical and professional skills.

Taxoff Data Analyst

Apr '23 - Jul '23

Intern | Charlotte, North Carolina

- Learned fundamental skills in bookkeeping, such as **reconciling** and categorizing transactions, and using **Excel macros** to automate tasks and **VLOOKUPS** for data retrieval.
- Helped reconcile over **5 company bank statements** while also categorizing and transferring transactions.
- Obtained skills in analyzing bank statements and working with finances.

TECHNICAL PROJECTS

Portfolio/Personal Web-site | HTML/CSS, JavaScript | [GitHub](#) | [Demo](#)

Jan '23 - Present

- Created & executed a personal website using **HTML**, **CSS**, & **JavaScript**, showcasing projects, resume, & achievements for improved readability & portfolio presentation.
- Overcame challenges by **debugging** and refining code to ensure functionality and improve overall site performance.

Data Demand (2nd place NetApp Hackathon) | Python | [GitHub](#) | [Demo](#)

Nov '24

- Designed a user-friendly program using **Python** to optimize data center operations by **minimizing server usage**, reallocating tasks, and delegating workloads across multiple servers.
- Implemented **multi-factor authentication** for secure user access and optimized data storage to reduce energy consumption and address cybersecurity risks.

E-Missions (1st place Volvo Group Hackathon) | [Demo](#)

Nov '23

- Proposed a digital solution to help Volvo Group track and reduce the carbon footprint of refuse truck fleets.
- Developed concepts for a mobile app, emission sensors, and a hybrid solar system, aiming to reduce fuel consumption by **30-50%**, savings approximately **4,300 gallons** of fuel per truck annually.

LEADERSHIP

Public Relations Chair

Oct '24 - Present

Association for Computing Machinery | Greensboro, NC

- Collaborated with fellow interns on various projects to improve club operations and engagement.
- **Gained outreach experience** by promoting club initiatives and enhancing personal communication and leadership capabilities.
